

Fully Integrated Electronic Plan Review for Infor Public Sector

DigEplan, electronic plan review for Infor IPS provides an efficient, flexible, and secure method for states, counties and cities to streamline electronic plan review and accelerate permit application processes, removing the need for paper, complex third-party integrations or disconnected PDF mark-up tools.

Further exploit your Infor IPS investment

Cities, counties and other public sector organizations can further exploit their investment in their chosen government technology platform when adding DigEplan. DigEplan enables users to efficiently work with electronic plans that need to be viewed, commented upon, stamped, and rejected or approved.

Infor users can instantly access plans and other supporting documents for analysis, viewing, annotation, stamping, printing, and archiving, removing the need for paper or cumbersome desktop PDF tools.

DigEplan is fully integrated to Infor so all interactions with the plans are recorded and available in the system of record

Reduce complexity and simplify your IT real estate

DigEplan does not require a separate portal, workflow, database, client installs, or file upload / download. It is fully integrated into your document management, screens, workflows and tasking, reducing complexity and providing an integrated user experience.

Managing duplicate functionality for workflow, document management and portals alongside complex third-party integrations is an overhead on day-to-day operations and creates complexity in customer support.

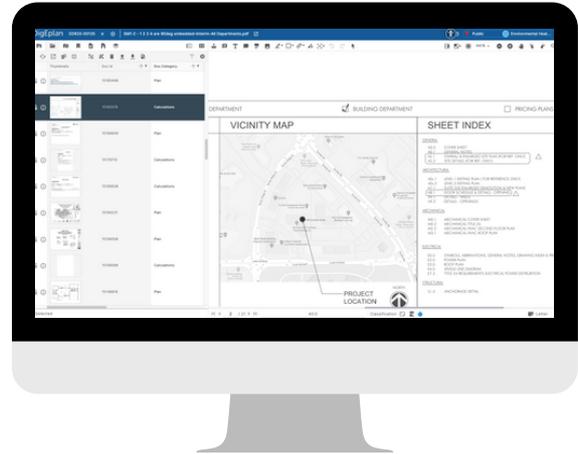

Remove inefficient, non-integrated PDF desktop tools

Permit applications are typically reviewed by multiple departments within a city and external stakeholders. Traditionally, with paper-based processes or non-integrated desktop PDF tools, reviews were completed in a consecutive manner with the application being passed around to each reviewer.

Desktop-based PDF tools require users to download and upload plans, and supporting documents, alongside a significant amount of manual data entry. This slow and inefficient practice leads to delays and less than timely approvals.

Using a fully integrated electronic planning review tool, reviewers can simultaneously review planning applications without any downloads, add their digital comments, and redlines at the same time. This serves to standardize, streamline and accelerate workflows for the electronic planning process.

DigEplan provides a rich set of engineering grade annotation features that allow reviewers to communicate, comment and add in-context observations and instructions, directly within plans and supporting documents.

DigEplan enables users to work with electronic plan workflow review cycles directly from their government technology platform

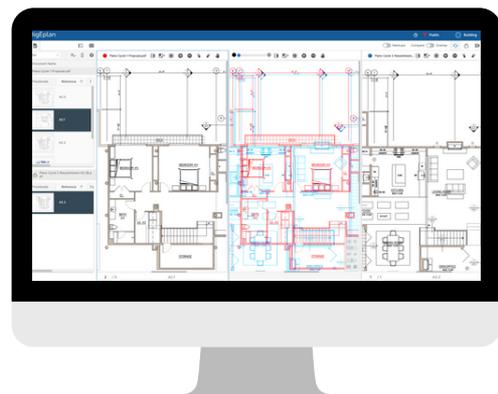

Lightning performance and reliability removing the need to triage plans

DigEplan's performance is comparable with desktop PDF viewing applications, but with all the advantages of full integration.

This allows organizations to work with large plan sets experiencing high performance for page loads and sheet navigation with engineering grade reliability. No more wait time, file opening issues or triage for plans required.

Instantly analyze resubmitted plans with the comparison and overlay function

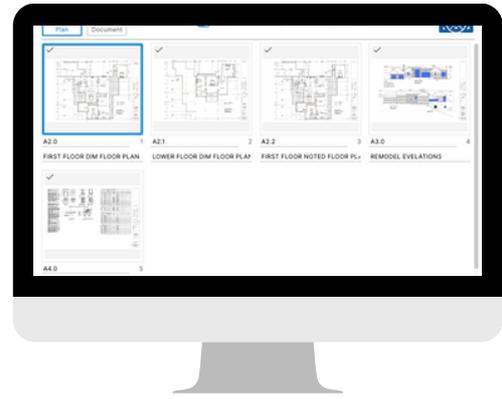

The compare capability allows users to instantly determine what has been added, removed, or changed in documents. This is particularly useful during the review of resubmitted plans or documents. Hard to spot differences between the original file and subsequent resubmittals can be easily identified, saving time and quickly catching accidental or intentional changes beyond what was requested.

Quickly and easily spot hard to see differences in subsequent review cycle

Increased productivity and simplified submission standards with sheet management

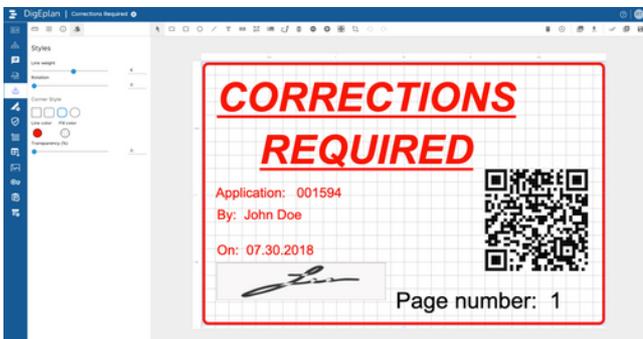

DigEplan supports the management of plans at a sheet level, removing the need to force applicants to resubmit entire plan sets at each cycle, or requiring plans to be split on upload, which is complicated and cumbersome.

Sheet management is automatic with DigEplan, so applicants and plan reviewers do not need to split plans on in-take

Intelligent and batch stamping processes

Reviewers can apply Intellistamps to electronically sign and stamp document sets with attributes from Infor. Intelligent stamps retrieve and insert information from Infor IPS, enabling quick approvals and digital sign-off. The sign-off stamp contains information about the annotation author, Case Id, date and time of creation, providing a reliable audit trail of changes and approvals.

DigEplan Intellistamps uses meta-data that supports electronic stamping and sign-off

Automatically extract correction comments from plan review cycles; combined with the plans with revisions required sheets

Once a document has been reviewed in DigEplan for Infor, the details of any correction comments can be extracted from the marked-up plans and used to populate the Infor comment tracking module and report. This allows comments to be tracked through multiple review cycles.

City of Digital
1408 Avenue North, Suite 101, Clearwater, FL 33765

Final Report - Corrections Required
Application No. EDR22-00154

Description: New build
Address: 9 9813
Record Type: Building - Electronic Review (DPC) BIF
Document #Name: Plans Cycle 1 Proposal.pdf

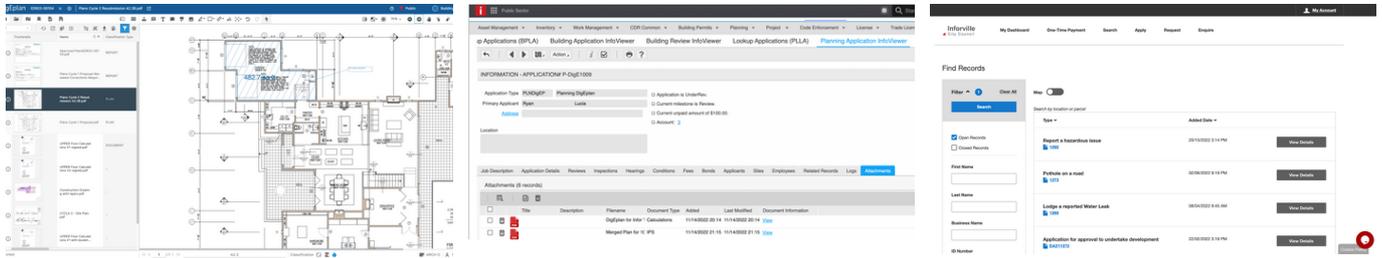

Corrections in the following table need to be applied before a permit can be issued

Comment ID	Page Reference	Correction Required	Author / Department	Status	Review Comments	Applicant Response Comments
1	A2.2	Yes	Richard Troth / Building	Open	GARAGE - HOUSE SEPARATION The garage shall be separated from the residence and its attic area by means of minimum 1/2" gypsum board applied to the garage side. Separation from habitable rooms above shall be by means of minimum 5/8" type X gypsum board. Door: 1 3/4" solid wood, 3 3/8" solid or honey comb core steel or 20 minutes fire rated, equipped with a self-closing device. No openings permitted into sleeping rooms. Ducts penetrating sheetrock shall be constructed of minimum 1/2" 20 ga sheet metal and shall have no openings into garage.	
2	A2.2	Yes	Richard Troth / Fire	Open	FLOOR SURFACES OF GARAGES AND CLOSETS SHALL BE OF APPROVED NONCOMBUSTIBLE MATERIAL. INDICATE ON PLAN THAT THE FLOOR USED FOR PARKING OF AUTOMOBILES OR OTHER VEHICLES SHALL BE FLOORED TO FACILITATE THE MOVEMENT OF LIQUIDS TO A DRAIN OR TOWARD THE NEAREST VEHICLE ENTRY DOORWAY. (SIC 800.1)	

Correction reports, that can be created based on the review status, all available in the system of record

Digital comment management using Civics a fully electronic process for correction comment management

Using DigEplan for Infor, correction comments can flow from the plan review process, through the back office and made available in Civics where applicants can respond directly.

Correction comments can be published to applicants where they can respond electronically, greatly reducing administration and improving plan review correspondence

Rapid configuration and go-live with DigEplan

DigEplan for Infor is configured by certified, highly experienced delivery partner TruePoint Solutions, with elapsed go-live times of less than 90 days, and less than 30 where workflows, Civics and the back office is already configured.

Key Benefits

- Cloud-based, DigEplan is configured in days
- Efficient electronic plan review and approval processes integrated to Infor
- Simplified IT real estate as no databased or desktop applications are required
- Supports green initiatives
- Improve permit turnaround time
- Compliance with Federal legislative policies
- Collaboration with developers, contractors and architects
- Accelerate permit request and processing time
- Simultaneous permit reviews
- Improve service delivery to citizens and commercial organizations
- Improve traceability and audit trails
- Maximized existing Infor investments
- Access critical document information from Infor processes and screens
